

## Process Engineer – Full Time (Inverness)

Salary Circa £27,000 (experience dependent)

We are looking for an experienced Process Engineer to develop best practices, routines and innovative solutions to improve production rates and the quality our product.

The successful candidate will be the Technical Lead in area focus groups and a member of our Technical team, contributing to the compliance and quality assurance of our production. The successful candidate will have the following qualifications, experience and attributes:

- Tracking and target monitoring of material usage, scrap/waste reduction, run rates, stock levels and production/manufacturing trends.
- Gather data through sampling to review equipment performance and optimise
- Provide process documentation and operating instructions, and ensure compliance
- Manage and analyse data, review impact of projects on lab testing results.
- Identify cost and variation reduction measures (using SPC), create project cost benefit analysis.
- Optimise online quality testing systems.
- Assisting in quality / non-conformance investigations and implementing changes
- SSoW / Risk Assessment implementation and compliance
- Strong communication with all levels (Management and Production)
- BEng/MEng in Chemical Engineering
- Excellent technical skills and process knowledge
- Practice in root cause analysis (RCA) and troubleshooting
- MS Office proficient
- Strong organisational and multi-tasking

If you have the above qualities, please send your current CV to [niki.cole@norbord.net](mailto:niki.cole@norbord.net).
